

#Meeting Agenda

Group: 20

Date: 24/10/18

Chair: Anthony T

Secretary: Hampus E

Participants: August S, Henrik T, Hampus E, Anthony T

Objectives (5 min)

Discuss the remaining work to be done.

Report

- Henrik and Anthony has been refactoring code. Interfaces for controllers have been implemented. Created a package for controller. Successfully moved the controllers and interfaces to the package. Furthermore, a controller class for button shortcuts was created.
- Hampus has added some functionality to the brush tool and solved double dependencies between tool package and model package
- August finished the UI for shapes and added functionality which lets you choose the shapes "thickness".

Discussion items (35 min)

Discuss the remaining work to be done.

- Peer review
- All diagrams for the report.
- Write texts connected to the figures.
- Documentation
- More tests?
- Add to definition of done.

Outcomes and assignments (5 min)

Discuss the remaining work to be done.

- Start writing on the peer review is the top priority. Thereafter everyone needs to focus on final report to finalize it. If there are spare time we should comment our code even more and write more tests.

Everyone should work on the final report.

- Henrik maybe refactor the imageModel class.
- Anthony create tests or help refactor imageModel class.

- August will work on final report etc. Also document the code and maybe some more tests.
- Hampus will work on some refactoring

Next meeting: Sunday 28/10-2018
